Ambiente 2020

Geislingen, February 2020

For a healthy indoor grilling experience:

WMF Lono Table-top grill with glass lid

The WMF brand is expanding its successful Lono Table-top grill series and launching the new Lono Table-top grill – a high-quality design including a removable electronic temperature control unit and protective glass lid for enjoyable healthy grilling. Thanks to the heat-insulated casing made of high-quality matt Cromargan®, you can sizzle, fry and grill with confidence – even indoors.

The first special feature of the youngest member of the Lono Table-top grill series is a heat-resistant, removable glass lid made of WMF safety glass which can also be locked at a 90-degree angle thanks to WMF Easy Handling: When closed, it ensures juicy and aromatic grilling results, as it prevents the food from drying out and preserves its natural flavours. What's more, the lid reduces odours and prevents fat splashes; while saving time and energy too, as the heat remains in the appliance.

The second special feature is the removable temperature control unit with intuitive touch operation and LED control icon (red = heat up, white = temperature reached): this means the grill has short reaction times and also maintains the plate temperature.

Press release

Ambiente 2020

The table-top grill has a total output of 2,200 Watts, so meat, fish, vegetables and the like turn out a tasty and aromatic success as usual. There is also plenty of space: the cast aluminium grill plate with non-stick coating offers a grilling surface of 40 x 29 cm.

When it comes to safety, the glass lid made of WMF safety glass not only meets the highest demands, but the heat-insulated Cromargan® casing also contributes to carefree, enjoyable barbecues. Even greater safety is also provided by the integrated, easy-to-remove fat drip tray with a safety switch that only permits grilling when the tray is in place. This high standard is also confirmed by the German GS mark ("safety tested"): this guarantees that a product fully complies with the requirements of product safety legislation. WMF is therefore offering its partners some important selling points, on the one hand, and enabling its customers to fully concentrate on preparing food with peace of mind, on the other.

As is usual with the series, the WMF Lono Table-top grill with glass lid can also be dismantled effortlessly, which makes it very easy to hygienically clean the individual parts. Both the glass lid and the grill plate are dishwasher safe.

Product details:

- Output: 2,200 Watts.
- Heat-insulated casing made of high-quality, matt Cromargan®.

About the WMF brand

The WMF brand has been setting standards with its innovations for more than 160 years. It is also an important source of inspiration within the market. Its products whet your appetite for wonderful food experiences with their exceptional design, perfect functionality and excellent quality. From preparing and cooking food to dining and drinking – four moments in which the WMF brand sits at the heart of the customer's life. WMF products make cooking a pleasure. From preparing ingredients using kitchen knives with precise cutting performance and cooking with innovative cookware, to dining with stylish cutlery, decanters and table accessories. Products from the WMF brand transform all these moments into something special. WMF is a brand within the WMF Group based in Geislingen an der Steige, which has been part of the French Groupe SEB consortium since the end of 2016.
