WMF 150 F and WMF 1200 F for even better filtering

Spoilt for choice: aromatic filter coffee or coffee filtered from freshly ground beans

The top-quality manufacturer from Geislingen has extended its range in the filter segment with the launch of two new machines - the WMF 1200 F and WMF 150 F. Whilst the smaller WMF 150 F will make up to 144 cups of aromatic filter coffee, the fully automatic WMF 1200 F will brew filtered coffee of the highest quality, whether cup by cup or in quantity.

As ever, filter coffee ranks very high. For breakfast catering or at conferences, festivals or in the office, the good classic cup or pot of filter coffee has a loyal following. These two new coffee machines from WMF, the 150 F and 1200 F, cater for this important – and growing – high-level segment of the market.

With their slim dimensions (22 x 52.8 x 54 - 56 cm - w/h/d) and attractive design of stainless steel, plastic, glass and lighting, the **WMF 150 F filter coffee machine** is the perfect article, whether used as an additional device or in stand-alone operation. Geared to supplying low to medium demand, this 7.5 kg gem features wonderfully simple operation: insert filter paper, add ground coffee, select quantity – done. The quantities brewed can be between one and two litres, with the user being able to follow the coffee-brewing process on the convenient display.

In contrast to this, the **fully automatic WMF 1200 F** is an absolute specialist for freshly ground filter coffee. Whether served as a single cup or in larger quantities, each sip offers the pure coffee enjoyment of freshly ground beans. Equipped with two bean containers, a practical hand applicator and up to six drink selector buttons, the caterer can adjust his offering to his guests' needs perfectly. Depending on how the drink is required, the WMF 1200 F can produce up to 180 cups of filtered coffee per day. An adjustable cup spout with a maximum height of 165 mm guarantees convenient placement of cup, beaker, pot or can. On the other hand there is an optional, side-extracting brewing arm designed for the rapid output of quantities of up to one litre at a time. A central hot water dispenser efficiently rounds off the range of functions on the fully automatic coffee machine. Thanks to its slender construction, the 38-kg wonder will fit into any space, however small, and is the ideal partner to combine with other WMF machines and accessories.
